Abstract

Tajikistan is a Muslim majority country located in Central Asia where Islamic finance has yet to be established. However, given the challenges of current banking practices in the country and the on-going adverse effects of the financial crisis, the authorities are looking for solutions to rectify the unproductive banking and financial system in the country. Accordingly, the purpose of this research is to investigate the prospects of introducing an Islamic banking system in Tajikistan through analysing adoption of Islamic banking using a quantitative approach. Besides that, this study also examines the mediating effect of perceived trust in the relationship between the relative advantages, awareness, product knowledge, social norm, and study are collected through a questionnaire administered to 408 respondents in Dushanbe, Khujand, and Qurghonteppa in Tajikistan. A measurement and structural model was formulated by adopting the structural equation modelling approach (using AMOS version 22.00). One of the major implications of this thesis is that the people in Tajikistan know generally about adoption an Islamic bank, but do not have much specific product knowledge, relative advantage towards adoption of Islamic banking. However, there is a lack of indirect relation between awareness and social norms via perceived trust. Therefore, there is a need for Islamic banking awareness campaigns and social norms to increase the level of trust in establishing an Islamic bank in the country. Another implication of this study is that the perceived trust can be a mediator variable between awareness, product knowledge, relative advantage, social norm, and adoption of Islamic banking.

Abstrak

Tajikistan, sebuah negara bermajoritikan Muslim, terletak di Asia Tengah di mana kewangan Islam masih belum ditubuhkan. Namun begitu, dengan cabaran sistem perbankan kini dan kesan sampingan krisis kewangan yang berterusan, pihak berkuasa sedang mencari jalan penyelesaian untuk memperbetulkan sistem kewangan dan perbankan yang tidak berkesan di negara ini. Sewajarnya, tujuan kajian ini adalah untuk mengkaji prospek dengan memperkenalkan satu sistem perbankan Islam di Tajikistan dengan menganalisis penggunaan perbankan Islam menggunakan pendekatan kuantitatif. . Selain itu, kajian ini juga mengkaji kesan pengantara penerimaan kepercayaan dalam perhubungan antara kelebihan relatif, kesedaran, produk pengetahuan, normal sosial. Data ini dikumpul melalui soal selidik dan 408 responden di Dushanbe, Khujand, dan Qurghonteppa di Tajikistan. Satu model struktur dan penanda aras telah dirumuskan dengan menggunakan pendekatan persamaan struktur (menggunakan AMOS versi 22.00). Salah satu implikasi terbesar tesis ini adalah rakyat Tajikistan secara umumnya mengetahui tentang penggunaan perbankan Islam, tetapi tidak mempunyai produk pengetahuan yang spesifik, kelebihan relatif ke arah penggunaan perbankan Islam. Namun begitu, terdapat kekurangan hubungan secara tidak langsung antara kesedaran dan normal sosial melalui penerimaan kepercayaan. Oleh itu, kempen kesedaran perbankan Islam dan normal sosial adalah diperlukan untuk meningkatkan tahap kepercayaan dalam menubuhkan sebuah bank Islam di negara ini. Implikasi lain kajian ini adalah penerimaan kepercayaan boleh menjadi pengantaraan pembolehubah antara kesedaran, produk pengetahuan, kelebihan relatif, normal sosial, dan penggunaan perbankan Islam.

Thanks to Almighty Allah for sparing my life to successfully end my study programmes. Equally, I found it necessary to thank Allah once more for giving me the ability and faced many challenges of the programme and overcoming them. Peace and Blessings be upon our noble Prophet Mohammad, his family and his companions.

I am indebted to my supervisor, Assoc. Prof. Ahmad Fauzi Bin Idris, PhD for his guidance, encouragement, tremendous help and support throughout my research. In the same time I would appreciate the kind help of Mr. Masari Azrul Bin Nayan during completion of PhD. Besides, I am pleased to appreciate for incredible support has been done by Prof. Dr. Haj. Wan Sulaiman Bin Wan Yusoff and his effective guidance during my PhD journey. I pray Allah reward them abundantly for giving me continuous supports to finish my academic journey and attain my goal.

To my beloved parents, who have always prayed for my success, no words can adequately express my thanks, but know that I am grateful.

I would also like to express my thanks and appreciation to my brothers and sisters and my loving wife and our beloved children, for their endless love, support and motivation. To my friends, my PhD colleagues who have supported me and assisted in my study activities thank you for journeying with me. I would also like to say a million thanks to the Dean, Deputy Dean and Staff in the Faculty of Muamalat and Management Science, and Postgraduate office for being good friends and commendable superiors. I would like to thank the editor and proof readers of this thesis especially Mr. Patrick Yeoh for being kind to me and professional in his work. And my external and internal examiners who contributed their time and effort to ensure this thesis will become a future reference in challenges and prospects of introducing studies in the context of Islamic banking. Finally I would like to thank friends and colleagues for their acts of kindness and support, in ways big and small that contributed to my success.
