## ABSTRACT

The main purpose of this research is to examine the relationship between demographic factors and other factors that influenced adolescents' perception towards National Service Training Program in Kem Tasik Meranti, Wang Kelian Perlis.

The data were collected by using quantitative method. The total number of 60 respondents were involved in this study. Data were then, analyzed through descriptive and inferential statistic including Pearson Correlation Coefficient, one way ANOVA and T-Test. The research outcome indicated that firstly, there was significant relationship between trainers and module of National Service Training Program with the adolescents' perception. Secondly, there was no significant difference between demographic factors which are gender, religion, race and education level with adolescents' perception towards National Service Training Program.

## SENARAI KANDUNG
